

Prompt Frameworks Reference Guide

Prompt Framework	Structure	Example	Best Usage
CRAFT Framework	Context, Role, Action, Format, Tone	Context: Fintech startup Role: Product Manager Action: Create GTM strategy Format: Table Tone: Executive	Business strategy, architecture docs, leadership communication, Linked In posts
RTF Framework	Role, Task, Format	Act as a recruiter. Write a referral message in Linked In format.	Quick writing tasks, emails, summaries, chats
CO-STAR Framework	Context, Objective, Style, Tone, Audience, Response	Context: AI startup Objective: Investor pitch Style: Concise Tone: Professional Audience: VCs	Presentations, leadership messaging, client communication
Chain-of-Thought (CoT)	Step-by-step reasoning	Explain the architecture and think step by step.	Coding, debugging, system design, mathematics
Meta Prompting	AI generates prompts after asking questions	Ask me questions and generate the best prompt for this task.	Advanced prompting, automation, prompt optimization
Role + Context + Constraints	Define role, context, and limitations	Act as a fintech architect and design a scalable payout system under high load.	Architecture design, consulting, technical problem-solving
Few-Shot Prompting	Provide examples before asking task	Example 1 → Output 1Example 2 → Output 2Now generate similar output.	Consistent writing, coding standards, formatting
Zero-Shot Prompting	Direct instruction without examples	Write a leadership Linked In post on AI transformation.	General AI tasks, fast outputs
Tree of Thoughts (ToT)	Explore multiple reasoning paths	Evaluate multiple solutions for scaling payment systems.	Complex decision-making, architecture evaluations
ReAct Framework	Reasoning + Acting iteratively	Analyze logs, identify issue, propose fix, validate solution.	AI agents, automation, troubleshooting
RISEN Framework	Role, Instructions, Steps, End Goal, Narrowing	Act as AVP Engineering and prepare a transformation roadmap.	Project planning, business analysis
TAG Framework	Task, Action, Goal	Task: Improve onboarding Action: Suggest automation Goal: Reduce turnaround time	Productivity prompts, operational improvements
BAB Framework	Before, After, Bridge	Before: Manual QAAfter: AI-driven QABridge: Automation roadmap	Marketing, storytelling, transformation messaging
AIDA Framework	Attention, Interest, Desire, Action	Attention: AI is changing fintech Interest: Faster settlements	Linked In posts, marketing content, campaigns
SCQA Framework	Situation, Complication, Question, Answer	Situation: Payments scaling Complication: High latency Question: How to solve? Answer: Event-driven architecture	Executive communication, presentations
SOAP Framework	Subjective, Objective, Assessment, Plan	Subjective: Merchant issue Objective: Failed transactions increased	Incident reports, operational summaries
5W1H Framework	Who, What, When, Where, Why, How	Who owns reconciliation?Why is failure happening?	RCA analysis, planning, investigation
PEEL Framework	Point, Evidence, Explain, Link	Point: AI improves QA efficiency Evidence: Faster execution cycles	Essays, thought leadership, analytical writing
STAR Framework	Situation, Task, Action, Result	Situation: Scaling issue Task: Improve throughput Action: Kafka implementation	Interview answers, leadership examples
CAR Framework	Challenge, Action, Result	Challenge: High latency Action: Caching layer Result: 40% improvement	Resume bullets, impact statements
PAS Framework	Problem, Agitation, Solution	Problem: Slow onboarding Agitation: Revenue impact Solution: AI automation	Marketing, sales messaging
SMART Framework	Specific, Measurable, Achievable, Relevant, Time-bound	Reduce transaction latency by 30% in 6 months.	Goal setting, project planning

Prompt Framework	Structure	Example	Best Usage
RACI Framework	Responsible, Accountable, Consulted, Informed	Responsible: Engineering Accountable: AVP Payments	Governance, project management
ICE Framework	Impact, Confidence, Ease	AI monitoring tool → High impact, medium effort	Prioritization, roadmap planning
MoSCoW Framework	Must Have, Should Have, Could Have, Won't Have	Must: Real-time alerts Could: Predictive analytics	Product management, sprint planning
OODA Loop	Observe, Orient, Decide, Act	Observe failures → Decide mitigation → Act quickly	Incident management, operations
PDCA Cycle	Plan, Do, Check, Act	Plan automation → Execute → Validate → Improve	Continuous improvement
SWOT Framework	Strengths, Weaknesses, Opportunities, Threats	Strength: Scalable platform Threat: Competition	Business analysis, strategy
OKR Framework	Objectives and Key Results	Objective: Improve merchant experience KR: Reduce failures by 20%	Goal tracking, leadership planning
MECE Framework	Mutually Exclusive, Collectively Exhaustive	Categorize all payment failures into unique buckets.	Consulting, structured problem solving
First Principles Thinking	Break down problem into fundamentals	Rebuild payment reconciliation from core assumptions.	Innovation, architecture redesign
Socratic Prompting	AI asks guiding questions	Why is the architecture failing under scale?	Learning, brainstorming, deep analysis
Delphi Method	Multi-perspective evaluation	Evaluate migration strategy from engineering, ops, finance viewpoints.	Strategic decisions, planning
Reverse Prompting	Define what to avoid	Generate architecture but avoid single points of failure.	Risk mitigation, architecture reviews
Self-Consistency Prompting	Generate multiple answers and choose best	Provide 3 architecture approaches and compare them.	Decision-making, optimization
Instruction Hierarchy Prompting	Prioritized instructions	Prioritize security over performance while designing system.	Enterprise AI workflows
Persona Prompting	Assign expert persona	Act as CTO of a fintech unicorn.	Leadership communication, architecture thinking
Debate Prompting	Simulate opposing viewpoints	Compare monolith vs microservices with pros/cons.	Architecture decisions, research
Multi-Agent Prompting	Multiple AI personas collaborate	Architect + QA + Dev Ops jointly review system.	AI agents, enterprise workflows
Iterative Refinement Prompting	Improve output step-by-step	Generate draft → Improve clarity → Add metrics	Content polishing, proposal writing
Constraint-Based Prompting	Define strict constraints	Design low-cost scalable architecture under ₹10 lakh budget.	Budget planning, optimization
Output Formatting Prompting	Specify exact response structure	Provide answer in markdown table with risks and mitigations.	Reporting, documentation
Comparative Prompting	Compare multiple options	Compare Kafka vs Rabbit MQ for fintech systems.	Technical evaluations
Diagnostic Prompting	Root-cause oriented prompting	Analyze why payment retries are failing intermittently.	Debugging, troubleshooting
Scenario-Based Prompting	Use hypothetical situations	If TPS grows 10x, how should architecture evolve?	Scalability planning
Temporal Prompting	Time-aware reasoning	Create 30-60-90 day transformation roadmap.	Leadership planning, onboarding
